Introduction

About Growing Up in Ireland

Growing Up in Ireland (GUI) is the national longitudinal study of children and young people in Ireland. Funded by the Government of Ireland, the study is overseen by the Department of Children, Disability and Equality, and the Central Statistics Office. GUI began with the recruitment of two cohorts of children in 2006. The older cohort, 'Cohort 98', were first interviewed when they were aged 9 years in 2007 and were most recently surveyed at age 25 in 2023. The younger of the two original cohorts, 'Cohort 08', were first surveyed at 9 months old in 2008/9. This cohort were followed up with at ages 3, 5, 7/8 (by post), 9, 13 and 17. Both cohorts were also invited to complete an additional 'Covid survey' in December 2020. In 2024, a third cohort of children were recruited, with first interviews at age 9 months being conducted in Winter 2024/25.

About this Document

This document contains the frequency tables from the Anonymised Microdata File (AMF) version of the dataset lodged with the Irish Social Science Data Archive (ISSDA) in respect of the respondents to the Growing Up in Ireland survey for Wave 5 of Cohort '98 that was conducted in 2023/24. They were aged 25 years at the time. While the tables are organised according to the sequence of questions in questionnaire, note that the preparation of data for the AMF means that not all variables are included on that file, and some answer options are modified or combined for anonymisation purposes. In addition, some long tables have been replaced with median statistics to reduce the length of this document. Excluded or modified tables may be available to view in their original form on the 'Researcher Microdata File', for which applications should be made to the Central Statistics Office. This document should be viewed in conjunction with the corresponding questionnaires in order to provide the utmost clarity. The variables presented in this booklet have been weighted according to the appropriate cross-sectional weight on the AMF. The original AMF dataset and the accompanying technical documentation are available from the Irish Social Sciences Data website at the following URL: https://issda.ucd.ie/dataset.xhtml?persistentId=doi:10.7929/ISSDA/7IANG6

A Note on How to Read the Tables

Missing and System values

Many questions' tables will display the row "Missing System" as observed in the table below:

Sex of person 1 in household

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Male	1192	35.3	43.7	43.7
	Female	1538	45.5	56.3	100.0
	Total	2730	80.8	100.0	
Missing	System	650	19.2		
Total		3380	100.0		

This row includes respondents who refused to answer that question, didn't know how to answer or the question was not applicable. For the above question, it is likely that the majority of the "Missing System" responses come from households with only a Primary Caregiver and a Young Person and no 3rd person, e.g. Secondary Caregiver.

Understanding the Different Percent Columns

As in the table above, the 4th and 5th columns display each response category as a percentage of the total sample; in this case, 35.3% (1,192 participants) of the total sample (3,380) are Male and 45.5% (1,538 participants) are Female. The 5th column, valid percent, displays each response category as a percentage of the participants that responded to the question (i.e., as a percentage of the 2,730 participants who answered "male" or "female"). The cumulative percent column displays a running sum of the valid percent.

Routing

Some questions are a result of routing, whereby they are only answered by participants who gave a certain answer on a preceding question. Not all routed questions are identified in the document, so if there is a large number of "No answer" responses for a question, it is possible that it is a result of routing and it would be advised to consult the questionnaire. An example below:

c98w5_PARENTSHOME Live with parents/guardians

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Yes	2364	69.9	69.9	69.9
	No	1016	30.1	30.1	100.0
	Total	3380	100.0	100.0	

c98w5_live_parents_dep Extent to living with parent(s) for financial reasons

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Mostly financial	1475	43.6	63.8	63.8
	A little bit to do with finances	542	16.0	23.4	87.3
	Nothing to do with finances	294	8.7	12.7	100.0
	Total	2311	68.4	100.0	
Missing	System	1069	31.6		
Total		3380	100.0		

As 1,016 participants answered "No" to question c98w5_PARENTSHOME, there was an instruction to skip question c98w5_live_parents_dep. The remaining 1,069 "Missing system" for Question c98w5_live_parents_dep are likely made up of the 1,106 "No answer" responses highlighted in c98w5_PARENTSHOME, who either missed the questions or declined to answer for some unknown reason.

Item Non-Response & Imputation

Item non-response is when a respondent fails to provide an answer to a particular question. Imputation is a technique that is used to overcome these gaps in a dataset and imputation is used for a number of these tables. Detailed information on how imputation was used in relation to this dataset can be found in the Summary Guide for Cohort 98 at Wave 5. This document can be downloaded here: https://issda.ucd.ie/file.xhtml?fileId=2597&version=3.0. For the main questionnaire, single imputation using a K-nearest neighbour model was employed. Overall, 57 variables in the main questionnaire have imputed values. Any imputed variables have an accompanying variable named "x_imp" where x is the 10 associated variable name – values that have been imputed are labelled as 1 and non-imputed values are labelled as 0.

Participated in all waves

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Did not participate in all waves	855	25.3	25.3	25.3
	Participated in all waves	2525	74.7	74.7	100.0
